DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4, 6, 8-10, 12, 13, 15, and 17-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Horng et al (US 2004/0032910).

Regarding claims 1, 2, 4, 6, 8-10, 12, 13, 15, and 17-24, Horng, as shown in figures 2 and 3, teaches a closed-loop space-time transmit diversity system and method comprising coding symbols (230), multiplying weight value (250) and transmitting symbols (240), multiplying a weight value to received signal and decoding (320, 310, 330). See also paragraphs [0009] and [0015] – [0024].

Allowable Subject Matter

3. Claims 3, 5, 7, 11, 14, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. References Onggosanusi et al (US 2002/0196842), Agrawai (US 6,873,606), and Walton et al (US 7,047,016) are cited because they are pertinent to the closed-loop space-time transmit diversity system and method. However, none of the cited references teaches or suggests, in combination, the further arrangements of the symbol group or weight value as recited in claims 3, 5, 7, 11, 14, and 16.
